Isomerism and General Organic Chemistry

1. The Newman projection below represents

- (a) A *staggered* form of 2-methyl propane
- (b) A *gauche* form of butane
- (c) A *eclipsed* form of 2-methyl propane
- (d) A most stable conformation of 2-methyl butane

Ans. (a) A *staggered* form of 2-methyl propane
